Software developer with over 2 years of hands-on experience in building web applications, enhancing system performance, and contributing to AI-driven solutions. Specialized in backend development and database management, with a proven track record of designing scalable architectures and integrating intelligent features into production systems.

Work experience

Back End Developer Aug 2022 - Sept 2022
creWin Online Denizcilik, Remote

I contributed to the backend development processes of a job platform for seafarers. I worked on microservice architecture, API integrations, and database design.
Tech Stack:
.Net,MSSQL

Software Developer Mar 2023 - Feb 2024
Src Yazılım, Remote

Developed a web application for Fourier analysis capable of performing complex calculations and graph visualizations, leveraging mathematical libraries like NumPy for efficient numerical operations.
Developed a custom widget replicating core functionalities of the Helium10 platform, streamlining product research and analysis processes.
Tech Stack:
.Net,MSSQL,Python,PostgreSql,LLM's,Flask

Full-Stack Developer Feb 2024 - May 2025
Infinity E-Learning, İstanbul/Sarıyer

Redesigned the reporting infrastructure by replacing Excel-based outputs with a centralized reporting page, consolidating multiple reports per module to improve accessibility and scalability.
Independently integrated the Constructor Proctor system into the platform architecture, enabling secure, real-time exam monitoring and reinforcing academic integrity through advanced anti-cheating measures.
Independently optimized system performance by restructuring localization logic, significantly improving load times and overall responsiveness.
Designed, developed, and integrated AI modules using machine learning algorithms, fine-tuned large language models (LLMs), and custom model deployments to extend platform intelligence.
Tech Stack:
.Net,MSSQL,Python,PostgreSql,LLM's,Flask

Education

Bachelor Degree In Computer Engineering Sept 2018 - Jun 2023
